# Windows 10, AppLocker Guide

**MDS Technology GB Division**

1. Run the 'Local Security Policy' as an administrator.
   Go to Security Settings > Application Control Policies > AppLocker, and select Configure rule enforcement.
   Check on 'Configured' in 'Executable rules'

2. Right click on 'Executable Rules' and select 'Automatically Generate Rules'

> 📁 Public Key Policies
> 📁 Software Restriction Policies
∨ 📁 Application Control Policies
  ∨ 🔳 AppLocker
    ∨ 📰 Executable Rules
       > 🖥 Window   Create New Rule...
       > 📄 Script Ru   Automatically Generate Rules...
   > 📦 Package   Create Default Rules
> 🛡 IP Security Polic

3. For preventing few apps running from the target account, we need to allow all the apps to be run from every account first.

Analyze all the apps under C:

Automatically Generate Executable Rules ✕

Folder and Permissions

This wizard helps you create groups of AppLocker rules by analyzing the files within a folder that you select.

User or security group that the rules will apply to:

Everyone   Select...

Folder that contains the files to be analyzed:

C:\   Browse...

Name to identify this set of rules:

C:

More about these settings

< Previous Next > Create Cancel
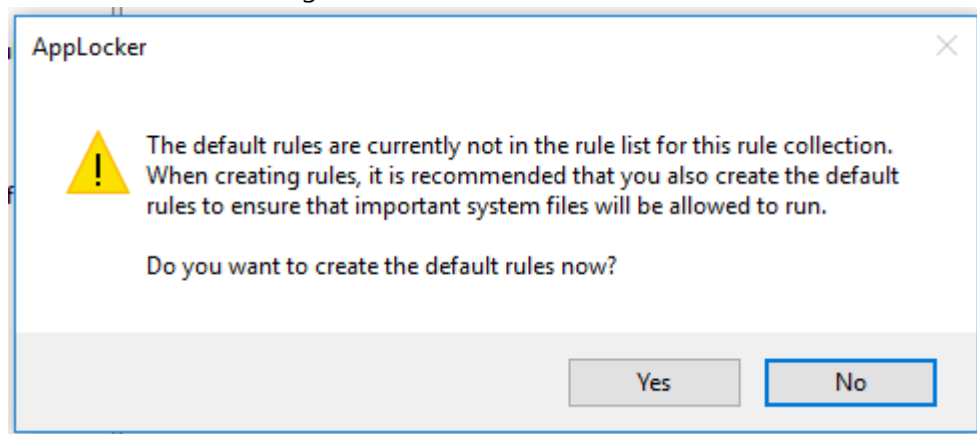

4. Click 'Next' with default setting on 'Rule Preferences'.
   Waiting for a moment, you will see the created rules.
   Click on 'Create'.

Automatically Generate Executable Rules   ✕

Review Rules

The folder analysis is complete and the following rules will be added to the policy.

Rule Type	Rules	Files
Publisher	19	1862
File Hash	114	141
Total	**133**	**2003**

☑ Review files that were analyzed

▨ View rules that will be automatically created

Click Create to close the wizard and create the rules.

⚠ Some folders and files could not be read during rule generation. The wizard has skipped these folders and files.

      < Previous   Next >   Create   Cancel

5. Click 'Yes' for below msg box to create default rules.

AppLocker   ✕

⚠ The default rules are currently not in the rule list for this rule collection. When creating rules, it is recommended that you also create the default rules to ensure that important system files will be allowed to run.

Do you want to create the default rules now?

      Yes   No

6. Find apps you want to block and set as below. (right click on the rule and select property)
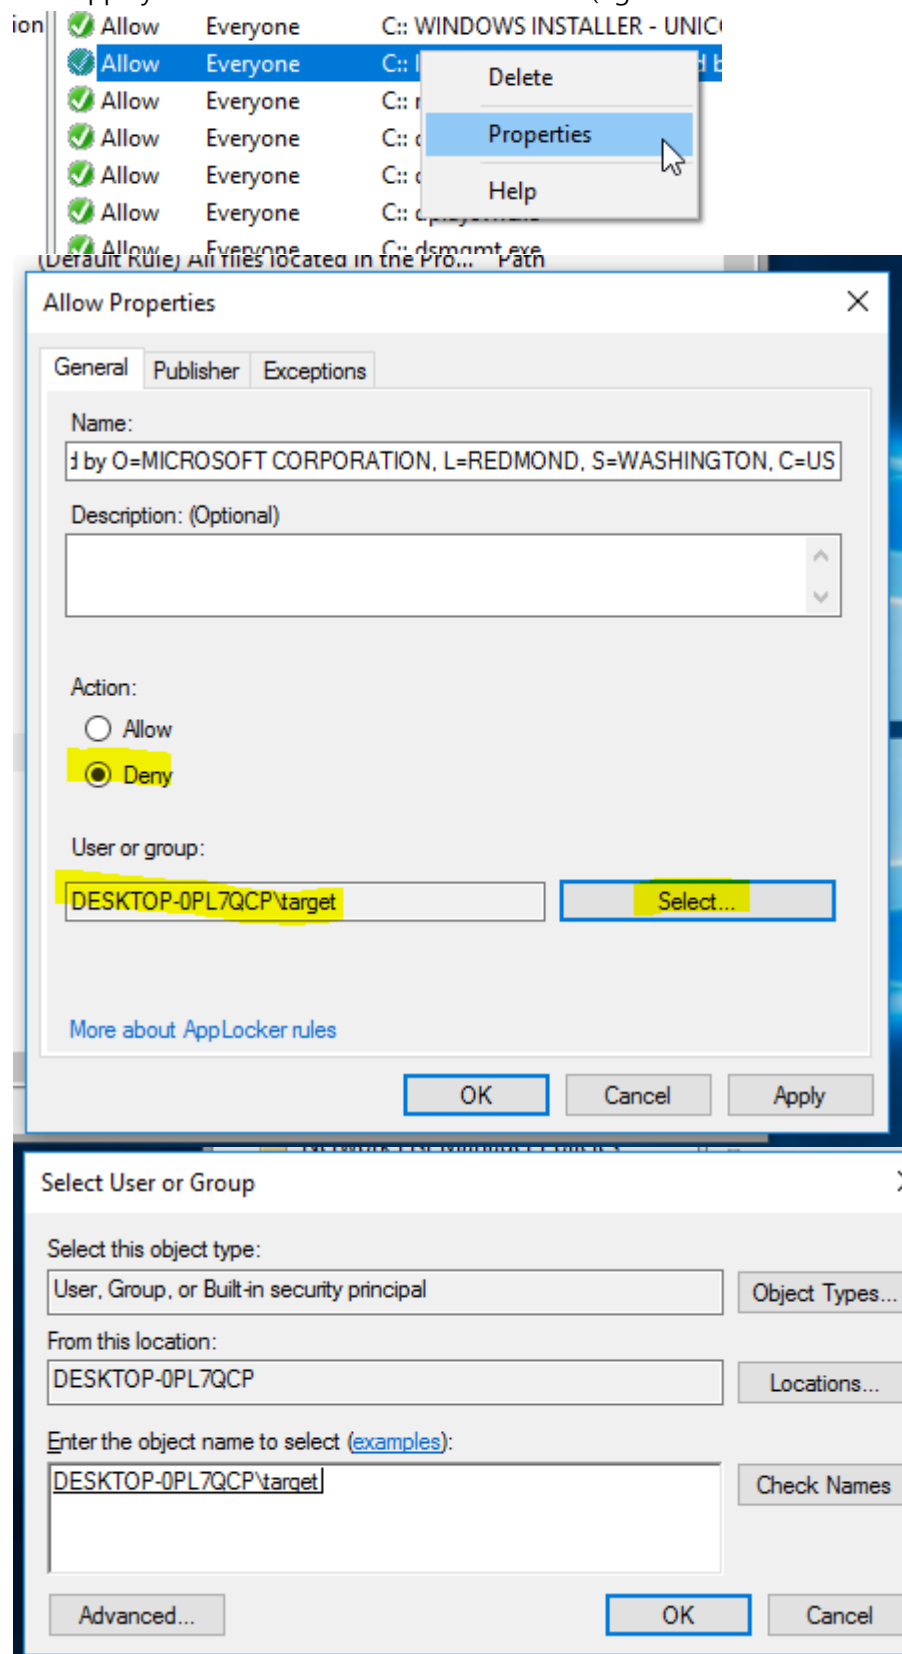

7. Run 'Command Prompt' as an administrator.
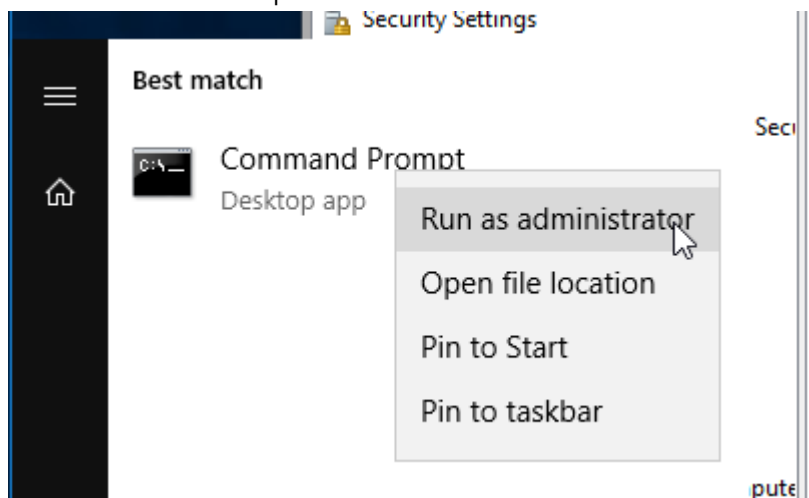

8. Type below command.

9. Restart the device.

10. After reboot, taskbar won't work.

Go to 'Local Security Policy' again and right click on 'Packaged app Rules' under AppLocker.

Select 'Create Default Rules' then taskbar will work soon.
